8. LLM 建议

Improve the website's structure by organizing headings more logically and reducing the number of H3 tags to enhance readability and SEO performance.

Increase the site's authority by acquiring high-quality backlinks and engaging in content marketing strategies to boost credibility and search rankings.

Enhance the text ratio and word count to provide more detailed content, which can improve engagement and SEO metrics.

Implement structured data (schema markup) to help search engines better understand the content and improve visibility in search results.

Ensure all security headers like HSTS and CSP are properly configured to protect the site and improve trust signals for SEO.
