8. LLM 建议

Improve technical SEO by addressing issues like low text ratio (1.76%) and optimizing the site structure for better crawlability.

Enhance content quality by increasing the word count and ensuring the content is more informative and engaging to boost the content score.

Build backlinks and establish domain authority through guest blogging, partnerships, and high-quality content to improve the authority score.

Optimize the site's performance by reducing load times and improving server response times to enhance user experience and SEO.

Ensure all structured data is correctly implemented and includes relevant schema types to improve search engine understanding and visibility.
